

ActiveReports Professional

Design, customize, publish,
and view .NET reports in less time

With code-based reporting, easy-to-use designers, and a flexible API, ActiveReports provides a reporting experience you'll love

Broaden your reporting reach with layout-driven page reports, data-driven RDL reports, and code-based section reports.

Leverage the lightning-fast, powerful, reporting engine to develop high-speed, complex dashboards and analysis.

Allow users to design ad-hoc, code-free reports with designer controls* embedded in your app.

Create a truly dynamic experience! Change controls' runtime behavior, implement raised events, and embed the reports in our royalty-free viewers.

Deliver the reports your enterprise needs! Design, publish, view, print, and export everything from invoices, expense reports, and tax forms to sales performance, budgeting, and revenue analysis reports. Develop the reports in code or give your end users the power—it's up to you.

ActiveReports Professional includes:

NET Report types

- Data-driven continuous RDL reports
- Layout-driven page reports
- Banded section reports

Report creation

- Create reports in Visual Studio with VSDesigner Add-In
- Design reports code-free with the standalone ProDesigner app*
- Add ad-hoc reporting for end users*

Dynamic .NET reports

- .NET overloadable events
- Comprehensive, flexible .NET API
- Control section report behavior using events
- Design dynamic .NET reports in code
- Change run-time behavior of RDL and page reports
- HTTP handlers*

Self-service reporting for end users

- Add ad-hoc reporting for end users*
- Construct reports from parts of other reports*
- Customizable set of .NET report designer controls*
- Install without Visual Studio for BI and IT teams
- Customize report layouts for different customers using Layers

Shared .NET Report Sources

- Nested data regions bound to different data
- Shared datasources and datasets*
- Visual Query Designer

Localize .NET Reports

- Major language character sets and locales
- Multiple languages supported
- RTL support
- Standard and custom multi-byte character sets

Interactivity

- Drill down
- Filter parameters
- Sorting

Streamlined design and customization

- .NET report themes
- Create and use custom controls in your project
- CSS-like stylesheets
- Master reports*
- Display richly formatted text in XHTML
- Embed SubReports in multiple reports
- Mail merge operations

Printing

- Add print methods to your reports
- Booklet and duplex printing
- Define different gutters and margins on odd and even pages
- Define paper sizes, page margins, watermarks, and page scaling
- PDF print presets
- Print selected layers, select paper trays, and set pages per sheet
- Scan preprinted forms for accurate layouts
- View printer job

Royalty-free viewers

- WinForms viewer
- WPF viewer with touch
- HTML5 Viewer
- ASP.NET Viewer*
- ASP.NET Viewer (Raw HTML)*
- ASP.NET Viewer (PDF)*

Report conversion

- Convert Crystal Reports
- Convert section reports to RDL
- Import layouts from Excel
- Convert MS Access reports
- Convert RPX reports

ActiveReports Server integration

- Publish ActiveReports directly to a server*
- Server-based report execution*
- Use reports already hosted on the server as report parts*
- Server-based shared data sources and data sets*

Data Sources

- Microsoft SQL Server
- Oracle Client Provider
- CSV files
- JSON data sources
- XML data sources
- ODBC Providers
- OLEDB Providers
- Data objects
- Extensible custom data providers
- Shared data sources and data sets*

Export

- CSV and Excel
- DOCX* and DOC
- HTML and XML
- JSON
- PDF
- Advanced PDF encryption* like security, settings, and embedded fonts
- RTF and Text
- TIFF

Chart Controls

- Area chart
- Bar chart
- Bubble chart
- Column chart
- Financial charts
- Line chart
- Pie chart
- Scatter chart

Data Visualization

- Banded lists
- Barcodes
- Bullets and sparklines*
- Calendars
- Containers and overflow placeholders
- Formatted and rich textboxes
- Images
- Maps*
- Tables
- Table of contents*
- Tablix in reports

*Not included in ActiveReports Standard.
