Developer Solutions

ActiveReportsJS

A Lightweight Reporting Tool for Web Applications

Cross-Platform Designer

PDF & Excel Exports

Fast Reporting Engine

Render your Reports in the Browser

<div>ActiveReportsJS Report *Unsaved Changes*</div> <div><div>✂️ 📄 📁 🗑️</div><div>⌵ ⌵ B I U A ⌵ 🖨️ ⌵</div><div>☰ ☰ ☰ ☰ ☑️ ☑️ ☑️</div></div>		
High-Performance ActiveReports Engine Leverage the powerful JavaScript API reporting tool to create lightweight analysis, budgeting, and financial reports	Client-Side Exporting and Printing Quickly generate WYSIWYG reports and export to PDF or Excel on the client-side. Allow your end users to print pixel-perfect reports	Dynamic Reporting Built-in support for drill down, drill through, and expressions for conditional formatting included
JavaScript Reporting for Any Framework Compatible with Angular, React, and Vue	No External Dependencies Written in TypeScript. Use in any web application. Customizable, and easy to use in VSCode	Multiple Report Types Pick from layout-driven page reports or data-driven RDL reports to create a full-featured report library

DESIGNER

Cross Platform Designer

Use ActiveReportJS designer in Mac, Windows, and Linux environments

Highly Functional Reporting

Allow users to create complex reports using the intuitive drag-and-drop GUI

Import and Convert Reports

Load existing RDLX reports and convert to RDLX-JSON

VIEWER

Render Reports on the Client-Side

Generate reports without any server interaction

Customize Viewer

Configure and modify the viewer's behavior using the reporting API engine

Create Interactive Reports

With support for drill downs, drill throughs, and sorting, your reports are more than just static data

DATA VISUALIZATION

Highly Functional Reports

Create reports in your web applications from multiple JSON data sources

Meaningful Data Insights

Effectively visualize your data with tables, charts, QRs, and barcodes using expressions and conditions

Robust Components

Utilize data-bound report controls, various chart types, and embed your data with barcodes and QR codes

Experience ActiveReportJS Expansive Feature Set

Report Types

- Data-driven RDL reports
- Layout-driven page reports

Report Creation

- Electron Report Designer

Viewer

- JS Viewer

Data Sources

- JSON

Report Conversion

- Convert ActiveReports *.rdlx Reports
